Bahamian Conservation Biology
Summer 2022

6-credit study abroad field course focused on the ecology, evolution, and conservation of aquatic ecosystems in The Bahamas

Directors: Dr. Brian Langerhans, Dr. Nils Peterson
Field Location: Andros Island, The Bahamas
BIO 495 (Ecological and Evolutionary Dimensions of Conservation Biology in the Bahamas, 3 cr.)
FW 445 (Human Dimensions of Conservation Biology in the Bahamas, 3 cr.)

Course Goals:
1. Learn fundamental concepts regarding ecological and evolutionary processes operating within the three primary aquatic ecosystems in The Bahamas
2. Evaluate the importance, procedures, and scientific foundations for conservation and management initiatives in The Bahamas
3. Learn field-based research methods and techniques
4. Conduct research project addressing important and unanswered questions, and write scientific paper describing results and implications

Resources: Readings, assignments, relevant links, etc. will be available on the class website at http://gambusia.zo.ncsu.edu/bahamas.html. Check the website frequently for updates and changes. Answers to general study abroad questions about class credit, rules, and regulations can be found on the SAO website at http://studyabroad.ncsu.edu.

Overview: The program comprises two separate 3-credit courses, but is taught as one comprehensive unit. The entire program lasts 10 weeks, including time prior to the trip (outside readings, research proposal), 2 weeks in the field, and time after the trip (data submission, research papers). Activities required before and after the trip can be conducted electronically.

Research Projects: Each student will be assigned to a team of multiple students. The team will conduct one of several potential projects (examples below). All students will learn the basic techniques required for all projects conducted during the course, and all students will work in all ecosystems during the course. However, each team will focus nearly exclusively on their project for approximately one week of the time abroad, working intensively to accomplish the research goals. Much of the work required before, during, and after our time on Andros will relate to these specific research projects. While we will aid in the study design and methodology (to facilitate appropriate methods for a successful project), the implementation and eventual success of the projects rest in the hands of each team. Each project investigates a novel research question that has never been addressed before, with the end goal being a quality research paper capable of being published in a peer-reviewed scientific journal. All projects are comparative or experimental studies that require data collection in the field to test fundamental hypotheses related to the ecology, evolution, and conservation of Bahamian aquatic ecosystems.

Past project topic examples:
1. Inland Blue Holes: effects of predator presence on aggression behaviors
2. Tidal creeks: effects of human-induced habitat change on diel behavioral patterns
3. Human dimensions: impacts of marine protected areas on Androsians
Project components:

1. Literature Review: a list of readings will be assigned, but you will be expected to find and review (many) additional sources of primary literature related to your topic.
2. Proposal: you will be required to summarize the current state of knowledge regarding your topic, identify intriguing and untested hypotheses regarding your topic, and explain how you will test those hypotheses.
3. Field Research: you will conduct a field research project based on methodology described in your proposal (and subsequent modifications).
4. Data Analysis: you will statistically analyze your data to generate the fundamental results of your project.
5. Write a Scientific Paper: you will write a scientific paper based on your research findings after you return from Andros.

Tentative Schedule:

May 18: assigned readings and project topics posted on course webpage; complete assigned readings; based on the readings and your research interests, submit your preferred research project by 5pm on May 23 (sooner the better). Project assignment will be based on student preference and project logistics.

May 24: project and team assignments posted on the course webpage; extended reading lists for each project posted on course webpage (you are responsible for reading those associated with your assigned project, and finding more literature)

May 24-31: write research proposal as a team
May 31: rough draft of research proposal due by 5pm
June 1-2: receive comments on rough draft, begin revising proposal
June 2-12: revise research proposal as a team based on comments, following any instructions regarding following up with additional sub-assignments

June 12: depart for Andros Island, The Bahamas!
June 17: final research proposal due, team proposal presentations that evening (~10-15 min)
June 17-18: revise proposal and methodology based on comments as needed
June 17-25: conduct projects!
June 27-July 8: work on data and paper (e.g. organize data, conduct analyses as necessary, literature review, outline paper)
July 8: final data sets, statistical results, paper outline due
July 9-15: work on finalizing all results, structuring and fleshing out paper, citing literature, more literature review, etc.
July 15: paper rough draft and final organized data sets, statistical results, tables, and figures due
July 18-25: revise paper
July 25: Final Research Paper Due

Completion and credits assigned if/when papers have addressed all concerns noted on edited drafts. Last day for submission of final revisions is July 29.

Grading:

- Research Proposal: 20%
- Fieldwork Participation, Responsibility, Collegiality (professor evaluation): 20%
- Fieldwork Participation, Responsibility, Collegiality (peer evaluation): 20%
- Data Organization and Submission, Research Paper Rough Draft: 20%
- Research Paper: 20%

Preliminary list of some major trip activities other than research projects:

- Orientation
• Lectures and discussions in field “classroom” prior to visiting field sites
• Visit inland blue holes, underwater observations, abiotic data-collection techniques, underwater survey methods, fish collection methods, evaluate some effects of predator-prey coevolution in these isolated systems
• Visit tidal creeks, above-water fish density survey methods, underwater community survey methods, assess some impacts of human-induced fragmentation on these systems
• Visit coral reefs and marine blue holes, underwater community survey methods, fish identification, assess effects of anthropogenic disturbance on these systems
• Visit cultural localities
• Each team gives presentation of their research plan to class

Academic Integrity:
Students are required to comply with the university policy on academic integrity found in the Code of Student Conduct found at http://www.ncsu.edu/policies/student_services/student_discipline/POL11.35.1.php

Academic Honesty:
See http://www.ncsu.edu/policies/student_services/student_discipline/POL11.35.1.php for a detailed explanation of academic honesty.

Honor Pledge:
It is the instructor's understanding and expectation that the submission of any assignment means that the student neither gave nor receive unauthorized aid on that exam or assignment. Giving or receiving unauthorized aid may result in an F for this course as well as more severe disciplinary penalties.

Electronically-Hosted Course Components:
Students may be required to disclose personally identifiable information to other students in the course, via electronic tools like email or web-postings, where relevant to the course. Examples include online discussions of class topics, and posting of student coursework. All students are expected to respect the privacy of each other by not sharing or using such information outside the course.

Accommodations for Disabilities:
Reasonable accommodations will be made for students with verifiable disabilities. In order to take advantage of available accommodations, student must register with the Disability Services Office (http://www.ncsu.edu/dso) located at 1900 Student Health Center, Campus Box 7509, 919-515-7653. For more information on NC State's policy on working with students with disabilities, please see the Academic Accommodations for Students with Disabilities Regulation at http://www.ncsu.edu/policies/academic_affairs/courses_undergrad/REG02.20.1.php.

Non-Discrimination Policy:
NC State University provides equality of opportunity in education and employment for all students and employees. Accordingly, NC State affirms its commitment to maintain a work environment for all employees and an academic environment for all students that is free from all forms of discrimination. Discrimination based on race, color, religion, creed, sex, national origin,
age, disability, veteran status, or sexual orientation is a violation of state and federal law and/or NC State University policy and will not be tolerated. Harassment of any person (either in the form of quid pro quo or creation of a hostile environment) based on race, color, religion, creed, sex, national origin, age, disability, veteran status, or sexual orientation also is a violation of state and federal law and/or NC State University policy and will not be tolerated. Retaliation against any person who complains about discrimination is also prohibited. NC State's policies and regulations covering discrimination, harassment, and retaliation may be accessed at http://www.ncsu.edu/policies/campus_environment or http://www.ncsu.edu/equal_op. Any person who feels that he or she has been the subject of prohibited discrimination, harassment, or retaliation should contact the Office for Equal Opportunity (OEO) at 919-515-3148.

Covid-19 Information from the University:
Due to the Coronavirus pandemic, public health measures have been implemented across campus. Students should stay current with these practices and expectations through the Protect the Pack website (https://www.ncsu.edu/coronavirus/). The sections below provide expectations and conduct related to COVID-19 issues.

Health and Participation in Class
We are most concerned about your health and the health of your classmates and instructors/TAs.

- If you test positive for COVID-19, or are told by a healthcare provider that you are presumed positive for the virus, please work with your instructor on health accommodations and follow other university guidelines, including self reporting (Coronavirus Self Reporting): Self-reporting is not only to help provide support to you, but also to assist in contact tracing for containing the spread of the virus.
- If you feel unwell, even if you have not been knowingly exposed to COVID-19, please do not come to class.
- If you are in quarantine, have been notified that you may have been exposed to COVID-19, or have a personal or family situation related to COVID-19 that prevents you from attending this course in person (or synchronously), please connect with your instructor to discuss the situation and make alternative plans, as necessary.
- If you need to make a request for an academic consideration related to COVID-19, such as a discussion about possible options for remote learning, please talk with your instructor for the appropriate process to make a COVID-19 request (a university-level form can be found here).

Health and Well-Being Resources
These are difficult times, and academic and personal stress are natural results. Everyone is encouraged to take care of themselves and their peers. If you need additional support, there are many resources on campus to help you:

- Counseling Center (NCSU Counseling Center)
- Health Center (Health Services | Student)
- If the personal behavior of a classmate concerns or worries you, either for the classmate’s well-being or yours, we encourage you to report this behavior to the NC State CARES team: (Share a Concern).
- If you or someone you know are experiencing food, housing or financial insecurity, please see the Pack Essentials Program (Pack Essentials).
Community Standards related to COVID-19
We are all responsible for protecting ourselves and our community. Please see the community standards (released on 7/28/2020) and Rule 04.21.01 regarding Personal Safety Requirements Related to COVID-19 RUL 04.21.01 – Personal Safety Requirements Related to COVID-19 – Policies, Regulations & Rules.

Course Expectations Related to COVID-19:

- **Face Coverings:** All members of the NC State academic community are required to follow all university guidelines for personal safety with face coverings, physical distancing, and sanitation. Face coverings are currently required in class and in all NC State buildings. Face coverings should be worn to cover the nose and mouth and be close fitting to the face with minimal gaps on the sides. In addition, students are responsible for keeping their course/work area clean. Please follow the cleaning guidelines described by the university.

- **Course Attendance:** NC State attendance policies can be found at: REG 02.20.03 – Attendance Regulations – Policies, Regulations & Rules. Please refer to the course’s attendance, absence, and deadline policies for additional details. If you are quarantined or otherwise need to miss class because you have been advised that you may have been exposed to COVID-19, you should not be penalized regarding attendance or class participation. However, you will be expected to develop a plan to keep up with your coursework during any such absences. If you become ill with COVID-19, you should follow the steps outlined in the health and participation section above. COVID-19-related absences will be considered excused; documentation need only involve communication with your instructor.

- **Course Meeting Schedule:** Your course might not have a traditional meeting schedule in Fall 2021. Be sure to pay attention to any updates to the course schedule as the information in this syllabus may have changed. Please discuss any questions you have with the instructor.

- **Classroom Seating:** To support efficient, effective contact tracing, please sit in the same seat when possible and take note of who is sitting around you; instructors may also assign seats for this purpose.

- **Technology Requirements:** This course may require particular technologies to complete coursework. Be sure to review the syllabus for these expectations, and see the syllabus technology requirements for your course. If you need access to additional technological support, please contact the Libraries’ Technology Lending Service: (Technology Lending).

**Diversity Statement**
Diversity of student experiences and perspectives is essential to the deepening of knowledge in a course. I consider it part of my responsibility as an instructor to address the learning needs of all students in this course. It is also the responsibility of all students to exhibit professional courtesy and respect for all members of the class. The course materials and discussions are intended to be respectful of social identities. Any suggestions that you have about other ways to incorporate diverse experiences in the course materials or discussions are welcome.

If you prefer to be called a different name and/or if your preferred pronouns are different than what are indicated on the class roster, please let me know. If there is a conflict between class
assignments and your religious observances, please let me know as soon as possible so that we can work together to make arrangements.

Students are responsible for reviewing the NC State University Policies, Rules, and Regulations (PRRs) which pertain to their course rights and responsibilities, including those referenced both below and above in this syllabus:

Equal Opportunity and Non-Discrimination Policy Statement
